Education

Anna University

Sep 2020-May 2024

Bachelor of Technology in Information Technology(CGPA:8.48)

Relevant Coursework

- Fullstack Development
- Frontend Development
- Database Management
- Web Development
- Backend Development

Projects

College Management System(Aug-2024)

Developed a web-based application using HTML, CSS, Bootstrap, jQuery, and Django Framework to manage student registration, courses, attendance, and performance. Ensured secure user authentication and role-based access for efficient administration.

DDoS Detection in SDN Environment using AI(Jan 2024 - May 2024)

Developed an intelligent system to detect Distributed Denial of Service (DDoS) attacks in a Software-Defined Networking (SDN) environment using machine learning techniques implemented in Python. The project involved simulating network traffic, extracting relevant features, training and evaluating machine learning models, and integrating real-time detection and mitigation strategies.

Airline Reservation System (HTML, CSS, JavaScript)

Built a basic Airline Reservation System enabling users to search flights, check seat availability, and confirm bookings. Designed a responsive interface and implemented dynamic functionality with JavaScript.

Technical Skills

- Languages:Tamil,English,Malayalam
- Programming Languages:html,html 5,css,css3,Javascript,php,python,Java,C programming,C++
- Technologies/Frameworks:Wordpress,Django

Hobbies

Listening Music

Writing
